

STEP UP TO FLOOR GRAPHICS

They're a smart way to stop your customers or visitors in their tracks!

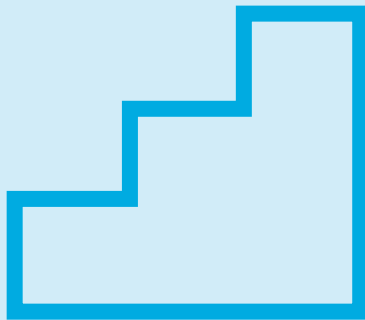

They're as versatile as

1. Use floor graphics to promote products, services or sales
2. Position them at events or facilities to direct the flow of traffic
3. Place them on arena floors to display a team mascot

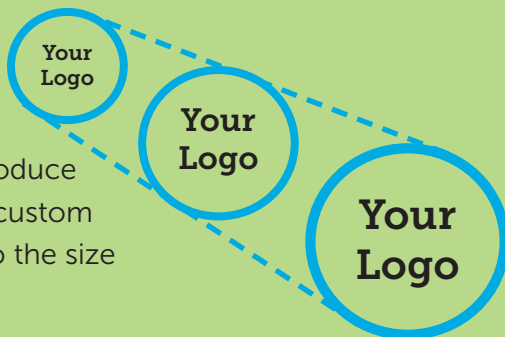

Go ahead and take the stairs

Think beyond "normal" flooring. Stairway steps and risers can be used for graphics and so can the floors of elevator cars.

Make a name for yourself

Or a logo, photo, lettering or artwork. For your floor graphics, we can accurately reproduce just about any image—custom design or otherwise—to the size you specify.

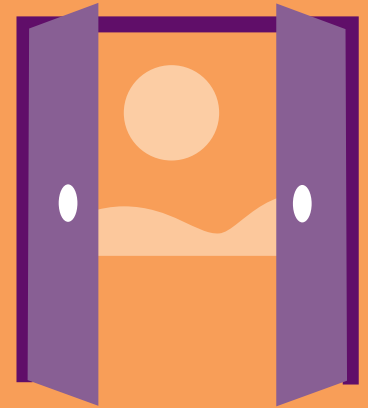

"FREE" promotional space!

Considered by many marketers to be "found" real estate, floors (and ceilings too) are now used for signage that sells products, services and events.

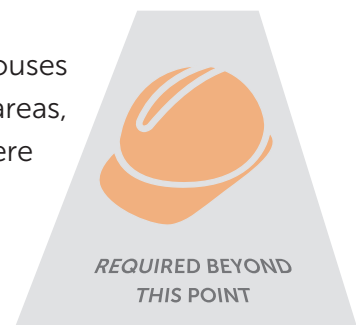

Indoors or out?

Many of our floor graphics are non-slip types used indoors on tile, wood or marble. But if your event floor is asphalt, concrete or even grass or carpet, we can still put graphics on it!

Industrial strength solutions

Use floor graphics in factories and warehouses to note high-traffic areas, forklift routes or where hard hats or safety glasses are required, among other uses.

Make tracks to Image360 for your custom floor graphics! A national resource with an extensive network of nearby Centers, we distinguish ourselves not only with comprehensive solutions, but also professional results.
